CSI Fresno presents:

Concrete Solutions for a Sustainable Future

Presented by Paulette Salisbury, California Nevada Cement Assoc.

Join CSI Fresno for our September Members Meeting as Paulette Salisbury, California Nevada Cement Association, looks at the environmental benefits of concrete. You will also learn:

- How to conserve storm water run off by filtering it through pervious pavement.
- To develop concepts for reducing albedo with light surfaces thus reducing energy consumption.
- The importance of building with durable long-lasting traditional materials in innovative designs
- Benefits to man-kind from building in a more sustainable manner.

Paulette Salisbury, FCSI, CDT is Technical Specialist with the California Nevada Cement Association (Portland Cement Association affiliate). She has 25 years experience in the construction industry as a resource specialist for design professionals specializing in concrete admixtures and cementitious products.

Join us at the PESC Offices:

4747 N First Street, Suite 140

Fresno, CA 93726
