Fall Protection Competent Person Certification

Building a Safer Industry One Member at a Time!

In the construction industry in the U.S., falls are the leading cause of worker fatalities. Each year, on average, between 150 and 200 workers are killed and more than 100,000 are injured as a result of falls at construction sites. In 2010 Fall Protection violations were #2 in OSHA's Top 10 Violations with 7,559 cited violations.

This course is designed for individuals responsible for using and inspecting personal fall arrest systems at the "competent person" level. The training provides experience, methodology, hands-on applications and an in-depth look at the regulations (Cal/OSHA) and standards (ANSI). The final phase covers the periodic "formal" inspection of personal fall arrest systems, and hands-on donning of PFAS.

Topics Covered Include:

Overview of Fall Prevention and Protection

The Need for Fall Protection

- Regulations
- Height trigger points and work being conducted

Hazard Analysis

- Recognition of hazards
- Evaluation criteria
- Control measures

Fall Prevention vs. Protection

Types of Fall Protection

- Guardrails
- Safety Nets
- Personal Fall Arrest Systems (PFAS), Positioning Systems

Fall Protection Plan

- What it is, elements
 - Controlled access zones
 - Roles and responsibilities of personnel
- General Principles of Fall Protection

- Fall clearance calculations

- Total fall distance calculations

- Minimizing fall forces

Personal Fall Arrest Systems (Hands-on exercises)

- Inspection procedures

- Donning procedures

- Fit test

- Selection, application and care of equipment

Fall Protection on Aerial Lifts and Ladders

Rescue

- Fall victim

- Suspension Trauma

- Self-rescue and assisted self-rescue

Fall Hazard Task
